Salem, Tamil Nadu.

Professional Summary

Aspiring AI Engineer with practical experience in Machine Learning Deep Learning, NLP, Flask, IoT systems, and AI automation. Skilled in developing intelligent real-time applications using Python, REST APIs, and cloud technologies. Passionate about building impactful AI-driven solutions with strong problem-solving and teamwork abilities.

Education

B.Tech Artificial Intelligence and Data Science.

[2023-2027]

M Kumarasamy College of Engineering, Karur.

CGPA - 8.09

Skills

Technical Skills

- **Programming Languages:** Java, Python
- **Web Technologies:** HTML, CSS, JavaScript (Basic)
- **Machine Learning:** Machine Learning, Deep Learning, Scikit-learn
- **Data Analysis & Visualization:** Pandas, NumPy, Matplotlib

Soft Skills

- **Management Skills:** Leadership, Time Management
- **Interpersonal Skills:** Communication, Teamwork
- **Critical Thinking Skills:** Problem-Solving, Analytical Thinking
- **Creative Skills:** Creativity
- **Adaptability Skills:** Adaptability

Tools & Technologies

- **AI & Deep Learning Frameworks:** TensorFlow, Keras
- **Backend & Web Frameworks:** Flask
- **Database & Cloud Platforms:** MySQL, Supabase
- **Automation & Development Tools:** Make (Automation Platform), Jupyter Notebook, VS Code

Professional Experience

AI intern - Grow your skills, Bangalore (online)

[June 30, 2025 – July 15, 2025]

- Gained hands-on experience in AI and Data Science using Python and Machine Learning.
- Improved technical knowledge and team collaboration skills.

Certifications

- IEEE Paper – Smart Connect System for the Homeless presented at an IEEE Conference.
- Best Innovation Award – Hackathon for HealthSprout: Nutrition & Fitness Tracking.
- Full Stack Development Certification – Novitech.
- Machine Learning Certification – Novitech.
- Completed “Python 101 for Data Science” (PY0101EN) – IBM Cognitive Class.
- Introduction to Data Science Certification – Cisco.

Projects

Illegal Electric Fence Detection and Prevention | AI Developer [Apr 2026]

Tech: Python, Flask, ESP32, Supabase, IoT Sensors | **Team Size:** 3

- Developed an AI-assisted IoT monitoring system using ESP32, Flask, and Supabase to detect illegal electric fence activities with real-time sensor monitoring, risk classification, and alert generation.

Cloud-Based Voice Messaging System | Full Stack Developer [Apr 2026]

Tech: Python, Flask, Twilio API, Supabase | **Team Size:** 1

- Developed a web-based voice messaging system using Twilio, Supabase, and Flask for browser-based voice recording, cloud storage, and real-time SMS notifications through shareable voice message links..

Fake Job Prediction System | ML Developer [Jan 2026]

Tech: Python, NLP, Scikit-learn, Flask | **Team Size:** 1

- Developed a machine learning model to classify job postings as real or fake using NLP techniques, improving detection accuracy and enhancing user trust in online job platforms.

House Price Prediction System | ML Developer [May 2025]

Tech: Python, Flask, Scikit-learn | **Team Size:** 1

- Developed a Flask-based web application using Scikit-learn to predict house prices based on property features. Implemented a Random Forest Regression model with a responsive frontend and backend API for real-time prediction results.

AI Personal Assistant Agent | Automation Developer [Jul 2025]

Tech: Make, Gemini AI, Telegram Bot API | **Team Size:** 1

- An AI-powered automation that connects Google Calendar, Gemini AI, and Telegram to manage schedules, generate summaries, and send real-time updates — built entirely using no-code tools on Make.
