Salem, Tamil Nadu.

Professional Summary

Software Developer skilled in building scalable Java applications with knowledge in AI/ML and automation. Passionate about building intelligent, real-time solutions that create meaningful impact and continuously improving software performance.

Education

B.Tech Artificial Intelligence and Data Science

[2023-2027]

M Kumarasamy College of Engineering, Karur

CGPA - 8.09

Higher Secondary Education (12th)

Sri Ramakrishna Sarada Higher Secondary School, Salem

[2022-2023]

Percentage - 89%

Skills

Technical Skills

- **Programming Languages:** Python, Java
- **AI & Machine Learning:** Machine Learning, Deep Learning
- **Frameworks & Libraries:** TensorFlow, Keras, Flask, NumPy, Pandas, Matplotlib, Scikit-Learn
- **Web & Databases:** HTML, CSS, JavaScript (basic), MySQL, Supabase

Tools & Technologies

- **Development & Cloud:** VS Code, Jupyter Notebook, Supabase Cloud, Git/GitHub
- **Automation:** Make (No-Code Automation)

Soft Skills

- Problem-Solving, Quick Learning, Team Collaboration, Adaptability, Communication Skills

Certifications

- IEEE Paper – Smart Connect System for the Homeless presented at an IEEE Conference.
- Cloud Computing (78%) - NPTEL
- Completed “Python 101 for Data Science” (PY0101EN) – IBM Cognitive Class.
- Introduction to Data Science Certification – Cisco.

Projects

BridgeCare – Smart Connect for Homeless | Backend Developer [Dec 2025]

Tech: HTML, CSS, JS, Python (Flask), Supabase, IoT Sensors | **Team Size:** 4

- Developed a web application aimed at connecting homeless individuals with nearby shelters, food resources, and support services, enabling better access to essential needs and improving community assistance

Illegal Electric Fence Detection and Prevention | Backend Developer [Apr 2026]

Tech: Android (Kotlin), Python, Flask, ESP32, Supabase, IoT Sensors | **Team Size:** 3

- Developed an AI-assisted IoT monitoring system using ESP32, Flask, and Supabase to detect illegal electric fence activities with real-time sensor monitoring, risk classification, and alert generation.

Cloud-Based Voice Messaging System | Full Stack Developer [Apr 2026]

Tech: HTML, CSS, JS, Python (Flask), Twilio API, Supabase | **Team Size:** 1

- Developed a web-based voice messaging system using Twilio, Supabase, and Flask for browser-based voice recording, cloud storage, and real-time SMS notifications through shareable voice message links..

AI Personal Assistant Agent | Automation Developer [Jul 2025]

Tech: Make, Gemini AI, Telegram Bot API | **Team Size:** 1

- An AI-powered automation that connects Google Calendar, Gemini AI, and Telegram to manage schedules, generate summaries, and send real-time updates — built entirely using no-code tools on Make.
